# Week 1 (July 2 - 5)
## *** 4 day camp week

## Ages 6 - 8:

### BLAST OFF

**Cost: $280**

It's time to explore what adventures are out there in space! Youth in this camp will get the chance to build their own creations as they learn about how math and physics combine together to get astronauts into space. As always there will also be plenty of time outdoors to help youth stay active. This camp is co-ed.

## Ages 9 - 11:

### FANTASTIC FORENSICS

**Cost: $280**

Come explore the fantastic field of forensics with us! Participants will get the opportunity to identify tire marks and footprints, learn how blood types work, and how to camoflauge themselves to conduct top secret missions. Youth will use the skills they've gained throughout the week to solve a mystery! This camp is co-ed.

## Ages 12 - 14:

### CODING BOOT-CAMP

**Cost: $280**

Coding and computers are a crucial part of all fields in STEM, so now is the best time to start learning and sharpen your skills! This workshop is an introduction to some of the basic coding skills including sequencing, if/else statements, loops, etc. We will be using the scripting language Python in this workshop. This workshop is co-ed.

**** This workshop is capped at 12 participants**
